(54) Title: A CAPILLAR Emitter FOR ELECTROSPRAY MASS SPECTROMETRY

(57) Abstract: Disclosed herein is an electrospray device for mass spectrometry that includes a fluid inlet, an outlet orifice, and a passage for fluid communication between the fluid inlet and outlet orifice. This passage is formed from a capillary (*i.e.*, a first capillary). This first capillary partially houses a second capillary such that the outlet orifice is narrowed. A portion of the second capillary extends beyond the first capillary. This extension permits a practitioner to clip away obstructed portions of the second capillary.
